

Incident ID	Title	Severity	Error Code	Error Message	Description
INC-001	Checkout payment failures	P1	PAY-4017	Webhook signature verification failed. No matching signing secret found for request.	Customers were unable to complete online payments after checkout. Payment callbacks consistently failed during webhook validation.
INC-002	Redis cache outage	P1	REDIS-1009	OOM command not allowed when used memory > maxmemory.	API response times increased dramatically due to Redis refusing write operations.
INC-003	Background jobs delayed	P2	DB-4003	ERROR: deadlock detected while waiting for ShareLock on transaction.	Celery queues increased rapidly and order processing was delayed.
INC-004	Image upload failures	P1	S3-4031	AccessDenied: User is not authorized to perform s3:PutObject.	Users could not upload profile and product images.
INC-005	Database connectivity failures	P1	DB-5002	Connection pool exhausted. Timeout waiting for idle connection.	All APIs depending on the primary database experienced intermittent failures.
INC-006	Container restarts	P1	NODE-6008	FATAL ERROR: JavaScript heap out of memory.	Image processing pods restarted repeatedly under production workload.
INC-007	Search indexing stopped	P2	FS-7005	No space left on device.	Search service failed to create new index segments because storage was full.
INC-008	OTP delivery failed	P1	SMS-4020	Twilio Error 20003: Authentication failed or account inactive.	Users were unable to receive SMS verification codes.
INC-009	Authentication failures	P1	AUTH-4015	JWT validation failed. Unsupported serialization format detected.	Multiple microservices rejected valid login tokens.
INC-010	Kafka consumer lag	P2	KAFKA-3006	Record batch size exceeded optimal threshold. Consumer lag increasing.	Event-driven order processing became delayed during peak traffic.
INC-011	DNS resolution failure	P1	NET-1001	Temporary failure in name resolution.	Application servers could not resolve internal service hostnames.
INC-012	SSL certificate expired	P1	TLS-2004	SSL certificate has expired.	External API communication failed due to expired certificate.
INC-013	Kubernetes pod crash	P2	K8S-3002	CrashLoopBackOff detected.	Backend deployment entered continuous restart cycle.
INC-014	Oracle tablespace full	P1	ORA-01653	Unable to extend table.	Database writes failed for billing module.

INC-015	Nginx gateway timeout	P2	HTTP-504	504 Gateway Timeout.	Reverse proxy timed out waiting for backend.
INC-016	Disk I/O latency	P2	IO-6001	Input/output operation timed out.	Storage latency affected reporting service.
INC-017	LDAP authentication outage	P1	LDAP-401	Invalid LDAP response from directory server.	Enterprise users unable to login.
INC-018	RabbitMQ queue blocked	P2	MQ-7003	Queue flow control activated.	Notification processing delayed.
INC-019	Elasticsearch cluster yellow	P3	ES-8005	Replica shards unassigned.	Search remained available with reduced redundancy.
INC-020	API rate limiting	P2	API-4290	Too Many Requests.	Clients exceeded configured API thresholds causing throttling.
